

WSQ Programme in Operations Management Innovation - Lean Improvement Towards Excellence (OMNI-LITE)

The WSQ OMNI-LITE programme is a joint initiative by the Singapore Institute of Manufacturing Technology (SIMTech), and the SkillsFuture Singapore (SSG) Agency. The objective is to train key personnel from manufacturing and service sectors, to be *productivity champions* who can help their companies achieve operational excellence.

The programme is based on the highly successful WSQ OMNI programme, which has helped many companies to achieve productivity improvements ranging from 20% to 200%. The programme consists of 10 half-day sessions (6 classroom sessions and 4 on-site mentoring sessions) spread over 1 month to 1.5 months. The classroom sessions combine knowledge sharing of key theories, concepts, frameworks, methodologies, tools and techniques; with interactive in-class discussions and hands-on exercises to reinforce the learning. The on-site mentoring sessions involve experienced SIMTech consultants going on-site to the companies for four half-day, 1-on-1 consultation sessions to assist and guide them on the use of the OmniMethodology™ and the implementation of productivity improvement initiatives through a project work.

Course Outline

- Understand the fundamental concept of operations improvement and productivity
- Understand the important link between business competitive strategy, operations improvement and productivity
- Understand and apply the approach to measure the performance
- Understand and apply the techniques and tools
- Understand and apply the OmniMethodology™

For Whom

This programme is relevant to management, senior staff in supply chain, procurement, logistics, inventory & warehouse management, manufacturing, production, engineering, industrial engineering, operations management and retail services.
